CyberLock® Helps Water Utilities Meet Federal Security Guidelines

CORVALLIS, OREGON, June 1, 2009—Videx announces CyberLock, a powerful electromechanical lock and key system that helps water utilities meet Federal Critical Infrastructure security guidelines by controlling and auditing access to chemical containers, reservoirs, pump houses, well sites, and watershed areas. CyberLock brings access and key control to existing lock hardware simply by replacing each lock's mechanical cylinder with a CyberLock electronic cylinder. Installation is quick and easy because it requires no wiring.

CyberLock gives management the ability to track contractors and employees that go into sensitive locations. The electronic lock cylinders, padlocks, and programmable keys record openings and unauthorized attempts to gain access in memory. This detailed audit reporting makes the CyberLock system very powerful.

Each electronic key can be programmed to open selected locks on specific days and only during certain times on those days. The key contains access privileges each employee needs to do their particular job. Keys can be set with a date to start operating as well as an expiration date. The CyberLock system eliminates worries about lost keys because the electronic key cannot be duplicated and a missing key can be quickly deactivated.

The use of stainless steel parts enhances the performance of CyberLock cylinders in the wet, corrosive environments found at water treatment facilities. Each CyberLock cylinder is built to the exact dimensional standards of the mechanical cylinder it is replacing. With over 200 electromechanical cylinder designs from which to choose, CyberLock cylinders can be installed in padlocks and in lock hardware on cabinets, interior and exterior doors, containers, utility vaults, and more.

About Videx

Videx designs and manufactures CyberLock access control products that are shipped worldwide from their headquarters located in Corvallis, Oregon. For more information about CyberLock, please contact Videx by phone at 541-738-5500, by fax at 541-738-5501, by email at sales@videx.com, or visit our web site at: www.videx.com.
