Videx Announces Enhancements to CyberLock® *New Products Give More Options for Access Control*

CORVALLIS, OREGON, April 1, 2009—Videx announces several new additions to the CyberLock family of products. The key-centric CyberLock access control system allows electronic keys to be programmed with an access schedule for opening locks and maintains an audit report of each opening. The new products include: CyberAudit-Web Professional, new software for managing small- to medium-sized businesses; two new communication devices, the Mini Keyport and WebStation, used to pass information between the software and the hardware; and a new CyberKey with a rechargeable battery.

CyberAudit-Web Professional is designed with mid-sized businesses in mind, easily managing up to 500 locks and 500 keys. This software can be installed on a PC or a Mac for local control, or on a server to support multiple users. Grouping locks and keys and assigning schedules is easily done. Web Professional also provides reports of which keys have opened which locks and when. These reports can be automatically emailed as a notification.

The Mini Keyport and WebStation are both communication devices. The Mini Keyport offers another option for users that want to update their keys from a remote location. It is durable and weather-resistant for outside installations. WebStation is a docking station for the CyberKey that can be used to connect directly to a desktop computer or to the network.

The rechargeable CyberKey is an environmentally friendly key with an overall battery life of three to five years. A quick charge of two hours will completely recharge an empty battery with enough power for 500 openings. Users now can choose between a rechargeable or replaceable battery CyberKey.

Videx, an engineering and manufacturing firm, has advanced the CyberLock product line with over 200 different electromechanical lock cylinder designs that replace the mechanical cylinder in standard lock hardware. For more information about CyberLock products, please contact Videx by phone at 541-738-5500, by fax at 541-738-5501, by email at sales@videx.com, or visit our web site at: www.videx.com.
