## It's Not Too Late!

If you missed our January 13th webinar, "Securing Your School on a Limited Budget," you can download a PDF of the session by clicking [here](#) or pasting the following link into your web browser: <http://www.videx.com/CyberLock/Applications/Schools.html>

## Win a CyberLock System at EMS Today

EMS Today is fast approaching! We invite you to join us at the show which takes place March 3-5 at the Baltimore Convention Center. Videx will be giving away a complete CyberLock Access Control Starter Kit that includes one of everything you need to get started. Stop by our booth #3732 and enter the drawing. You could be the lucky winner!

## Making the Difference in Life-and-Death Situations

Complacency is not a word that you will ever hear associated with the Clark County Fire Department in Las Vegas. This busy fire department is always looking for ways to improve their services. Recently, they turned their attention to narcotics management. When paramedics are treating someone experiencing a medical emergency, having the necessary drugs on hand can make the difference between life and death. The department wanted a system of checks and balances to ensure that all controlled substances onboard their rescue vehicles were accounted for and available at all times. Click [here](#) to read how CyberLock is helping them meet this critical need. You can also paste the following link into your web browser: [http://www.videx.com/News\\_and\\_Events/Editorials.html](http://www.videx.com/News_and_Events/Editorials.html)

## When Security Cameras Are Not Enough

Are the security cameras you have in place providing everything you need to protect and secure padlocked areas? While cameras may act as a deterrent, they are only a small piece of an effective access control solution. Cameras are for observation, not prevention. Cameras cannot control individual access to your physical assets. In most situations, they will not protect you from vandalism and theft.

The good news is that CyberLock offers a viable solution that complements the cameras you already have in place. Simply replace the mechanical padlocks on your gates, containers, equipment, and cabinets with CyberLock electronic padlocks. The electronic padlocks and programmable keys will quickly give you complete control over who and when someone can open a gate or access a cabinet that is sheltering cyber assets. What's more, the system's audit reports can be valuable when government agencies request electronic documentation of traffic and lock activity in specific areas.

Here are comments from organizations that have enhanced their security with the CyberLock solution.

*"With CyberLock, we can provide substantial proof to the Health Department and EPA that we are diligent in our efforts to secure our facilities and keep the public water supply safe."* James Price, Technical Support, Collier County Water Department

*"The physical cyber assets we are protecting with CyberLock are critical under CIP standards. CyberLock has eliminated issues we experienced in the past with key duplication."* Bob Blickensdorf, Security Manager, ITC Holdings

*"We wanted better control over who entered our buildings and a system that would allow us to track key usage. With the electronic lock system, we have achieved that. Now we can track vendors completing services and other functions."* Jackie Johnson, Manager of Operations, Verizon Wireless, Carolina Region

## Videx Tradeshow Schedule Through June 2011

### EMS Today, March 3-5

Baltimore Convention Ctr.  
Baltimore, MD  
Booth #3732

### ISC West, April 6-8
