CyberLock Wins Yet Again!

The CyberLock system has been recognized once again for its superior design and innovation. Building and facility executives honored CyberLock with the "Building Operating Management 2012 Top Products Award" out of a field of nearly 560 competing products. CyberLock will be showcased in the January issue of BOM magazine.

Videx Breaks the Barrier

Facilities have long benefited from the wireless, key-centric access solutions CyberLock provides. This year, with the unveiling of the new CyberLock Flex System, Videx took access control to the next level by breaking the barrier between wire-free and hardwired access control. Now, wire-free CyberLock eCylinders and smart padlocks work hand-in-hand with Flex System hardwired access devices and operate under one cohesive access management software.

CyberLock in History

In 2000 CyberLock was showcased in Parade Magazine as "High-Tech Security." Today, almost twelve years later, Videx has over 280 different lock designs and CyberLock is still considered a cutting edge security solution with thousands of installations all over the world. See the attached copy of Parade Magazine.

Shot Several Times with a High-Powered Rifle

Reco Construction in Grand Prairie, Alberta, Canada, secures their gravel pits with the CyberLock system. Earlier this year, someone attempted to break into their remote gravel pit and failed, thanks to the highly-secure CyberLock padlock they had in place.

"Apparently someone wanted to get in our pit really badly, so they shot the lock several times with a high-powered rifle. As you can see from the photos, after at least three direct hits, the Videx cylinder and lock still refused to open up. We were quite impressed."

Come see us at the Utility Products/DistribuTECH Conference and Expo

Videx will be exhibiting at the Utility Products/DistribuTECH Conference and Expo in San Antonio, TX, January 24-26. The show is being held at the Henry B. Gonzalez Convention Center. If you are in the area, we would be delighted to have you visit us at booth #3012. You can register for free exhibit hall admission by filling out the attached show pass using Priority Code: **DTUP-ET**.

Web Authorizers store access permissions and access activity even when the power goes out.
