## ASIS Report

We've just returned from the ASIS security show in Orlando where our CyberLock Flex™ Door & I/O™ module made its official debut. ASIS was an exciting show for us. There was a lot of interest in the new module and traffic to our booth was steady. The time just flew by! We enjoyed meeting those of you that visited us at ASIS and thank you for stopping by to see us.

## CyberLock Resides in "The Hamptons"

The Village of Southampton has a lot going for it. With a rich history that dates back to 1640 when sailing ships brought the first English Puritans to its shores, the village is the oldest English settlement in the state of New York. In modern times, Southampton boasts fabulous beaches and is part of the prestigious summer colony known as The Hamptons. Village schools are a hub of activity and CyberLock is helping to ensure a safe environment for students, staff, and members of the community. Click [here](#) to read the full Southampton story or paste the following link into your web browser:

*"The CyberLock system increases a school district's access control measures ten-fold."*  
**James Gresham, Director of Security, Southampton School District**

## It's Not Too Late to Register for our Webinar on Securing Critical Infrastructure

Videx will be hosting an educational webinar, "Critical Security for Critical Infrastructure," on Wednesday, September 28. Tailored to those responsible for securing perimeters and tracking the movements of individuals at power stations, nuclear plants, telecom and electric transmission sites, the webinar will demonstrate how CyberLock can help utilities meet their security objectives while staying within budget. Register for this engaging webinar to learn how CyberLock can quickly and significantly raise a facility's level of security. To reserve your webinar seat click [here](#) or paste the following link into your web browser:

## Water Utility Security: Keep It Simple

Jim McGowan, Videx VP of Sales & Marketing, shared his thoughts on what makes a water utility security installation successful during the September 13th Virtual H2O Conference. Jim's presentation, "Water Utility Security: Keep It Simple," focused on pre-planning and knowing what issues need to be considered beforehand. Click [here](#) to download the presentation that covers essential points for choosing an access control solution and how CyberLock fits into the picture.
